Exploring is a career education program for young men and women who are 14 through 20 years of age. Exploring's purpose is to provide experiences to help young people mature and to prepare them to become responsible and caring adults. Explorers are ready to investigate the meaning of interdependence in their personal relationships and communities.

Exploring is based on a unique and dynamic relationship between youth and the organizations in their communities. Local community organizations initiate an Explorer post by matching their people and program resources to the interests of young people in the community. The result is a program of activities that helps youth pursue their special interests. Exploring is based on five areas of emphasis: career opportunities, life skills, citizenship, character education, and leadership experience.

Attached is a list of current Exploring programs for students and parents to come out and learn more about their exciting programs.
